

Changing Patterns of Mass Media Coverage of Nanotechnology Risks

Sharon M. Friedman and Brenda P. Egolf

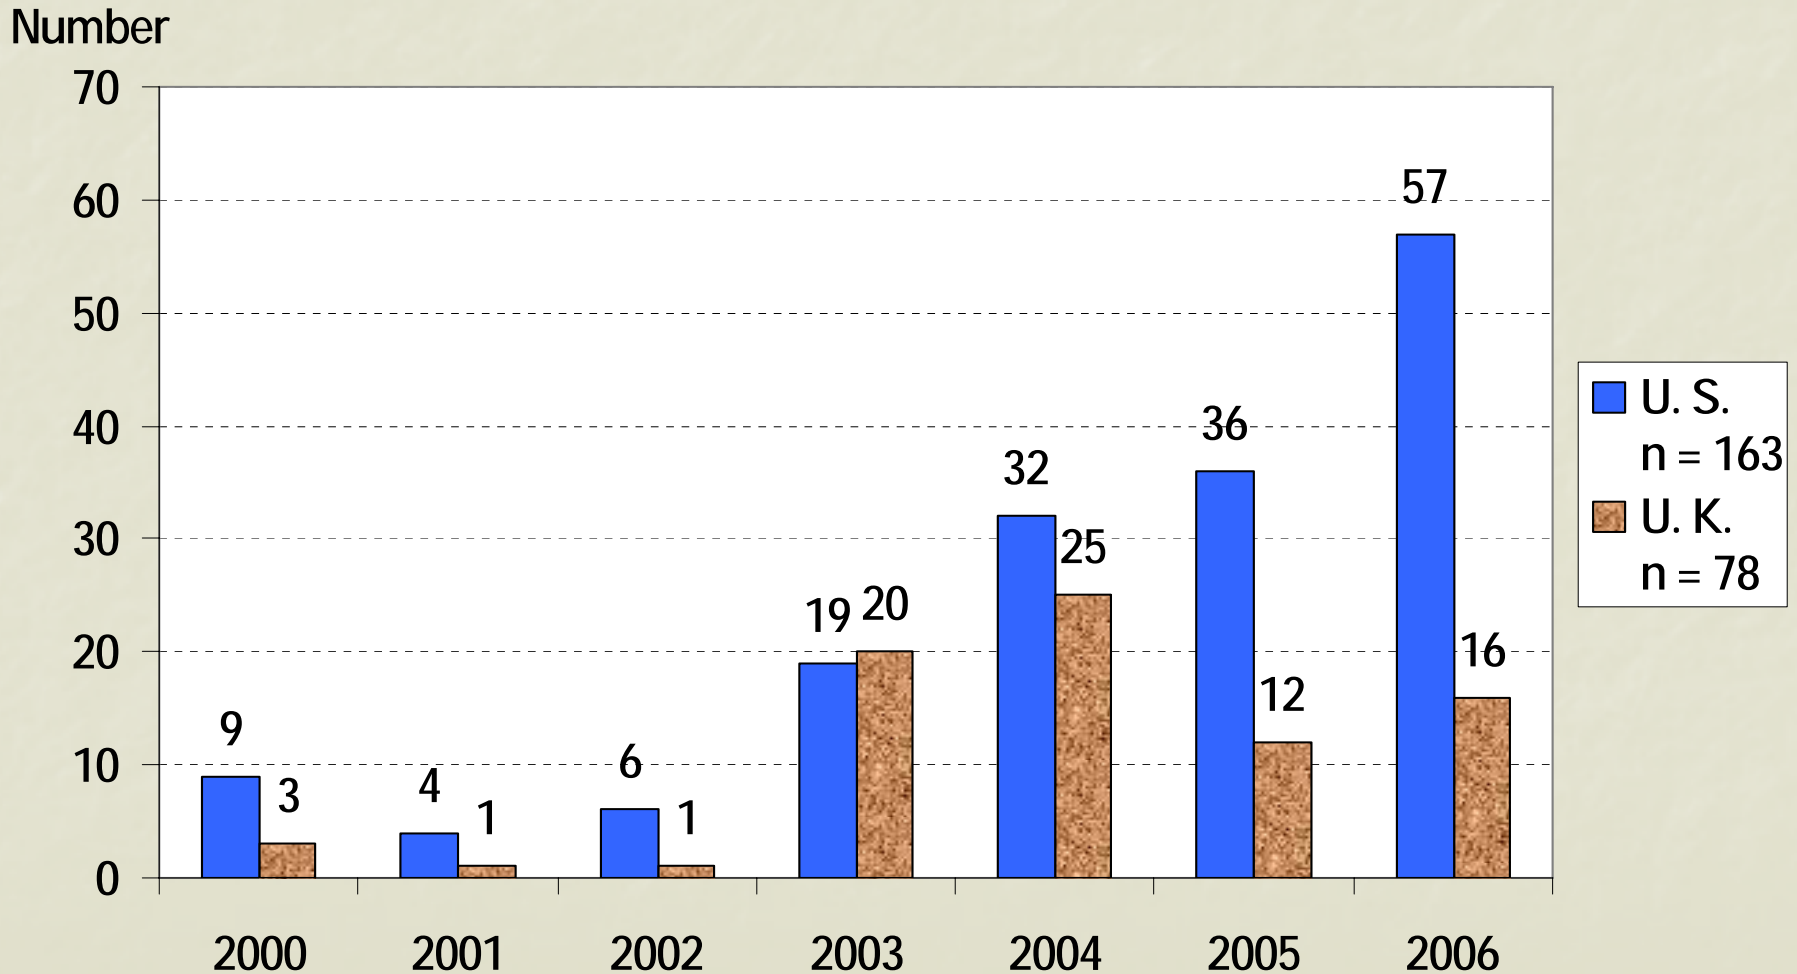

Lehigh University

Project on Emerging Nanotechnologies
Woodrow Wilson International Center for Scholars

December 18, 2007

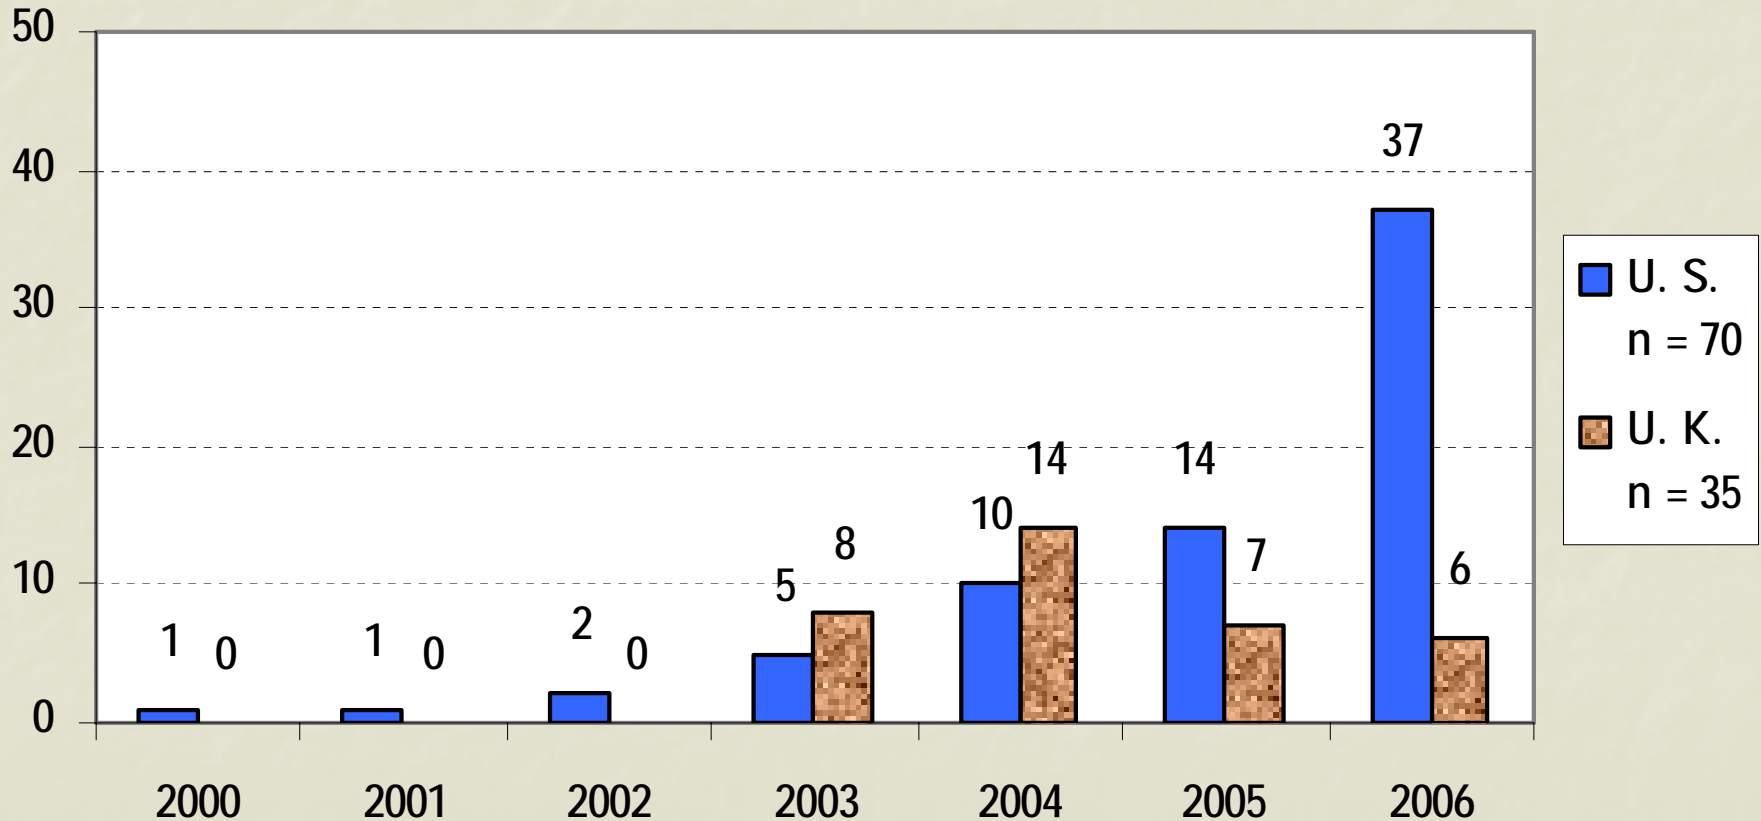

Number of U.S. and U.K. nanotechnology risk articles

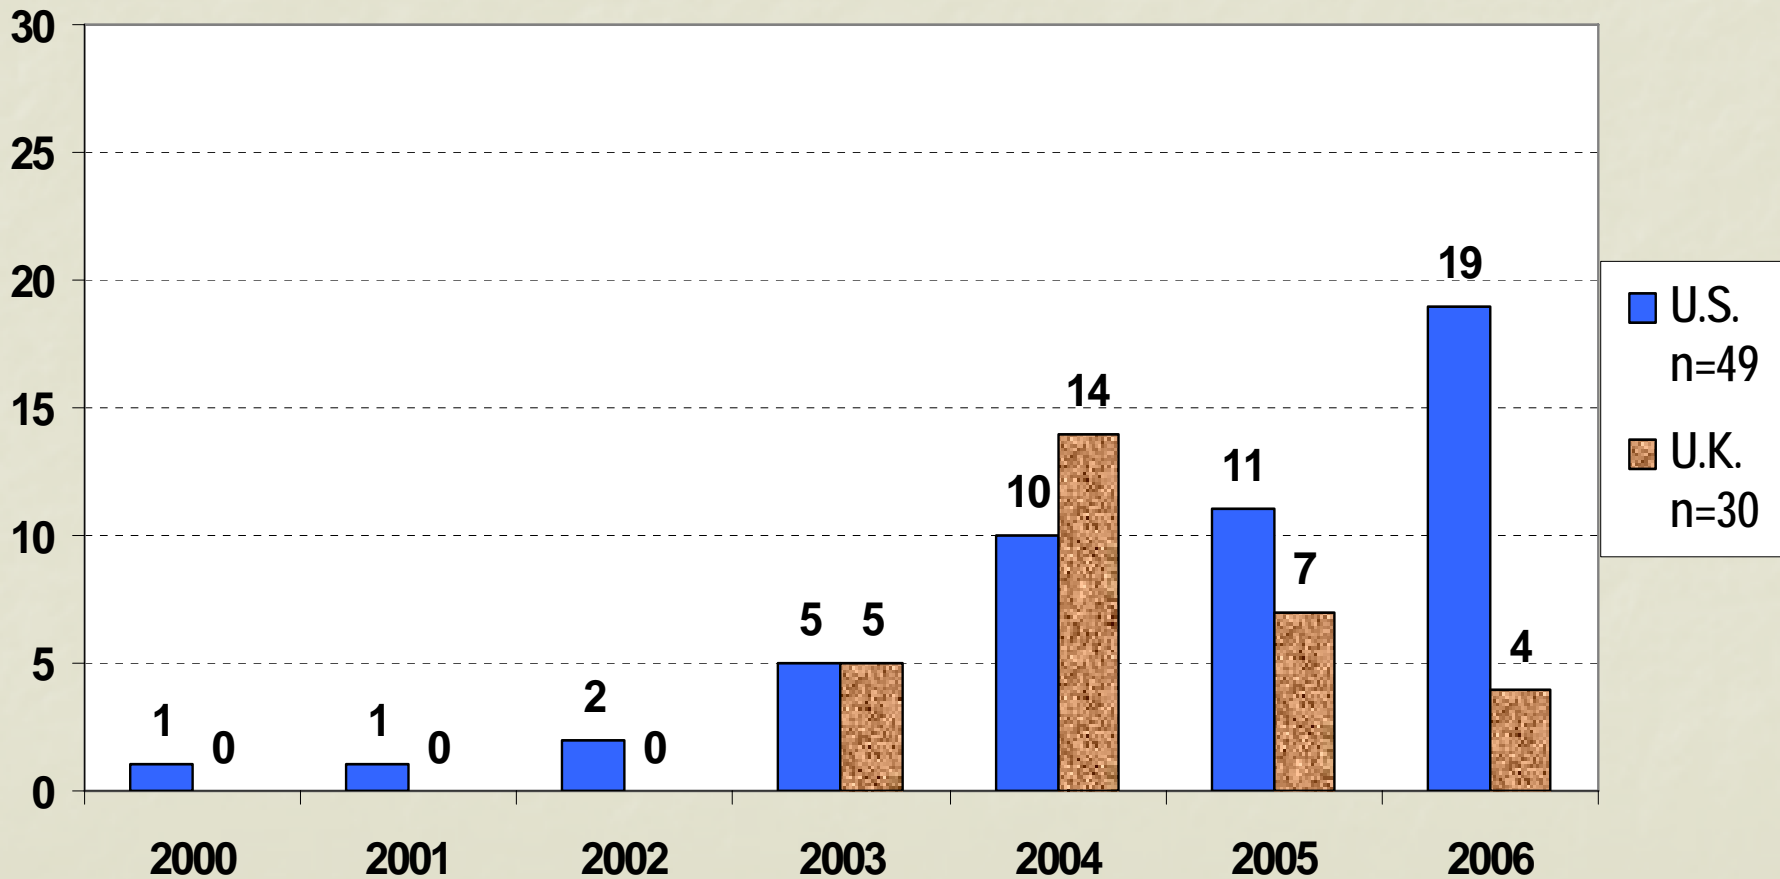

Number of articles about regulation of nanotech risks

Number

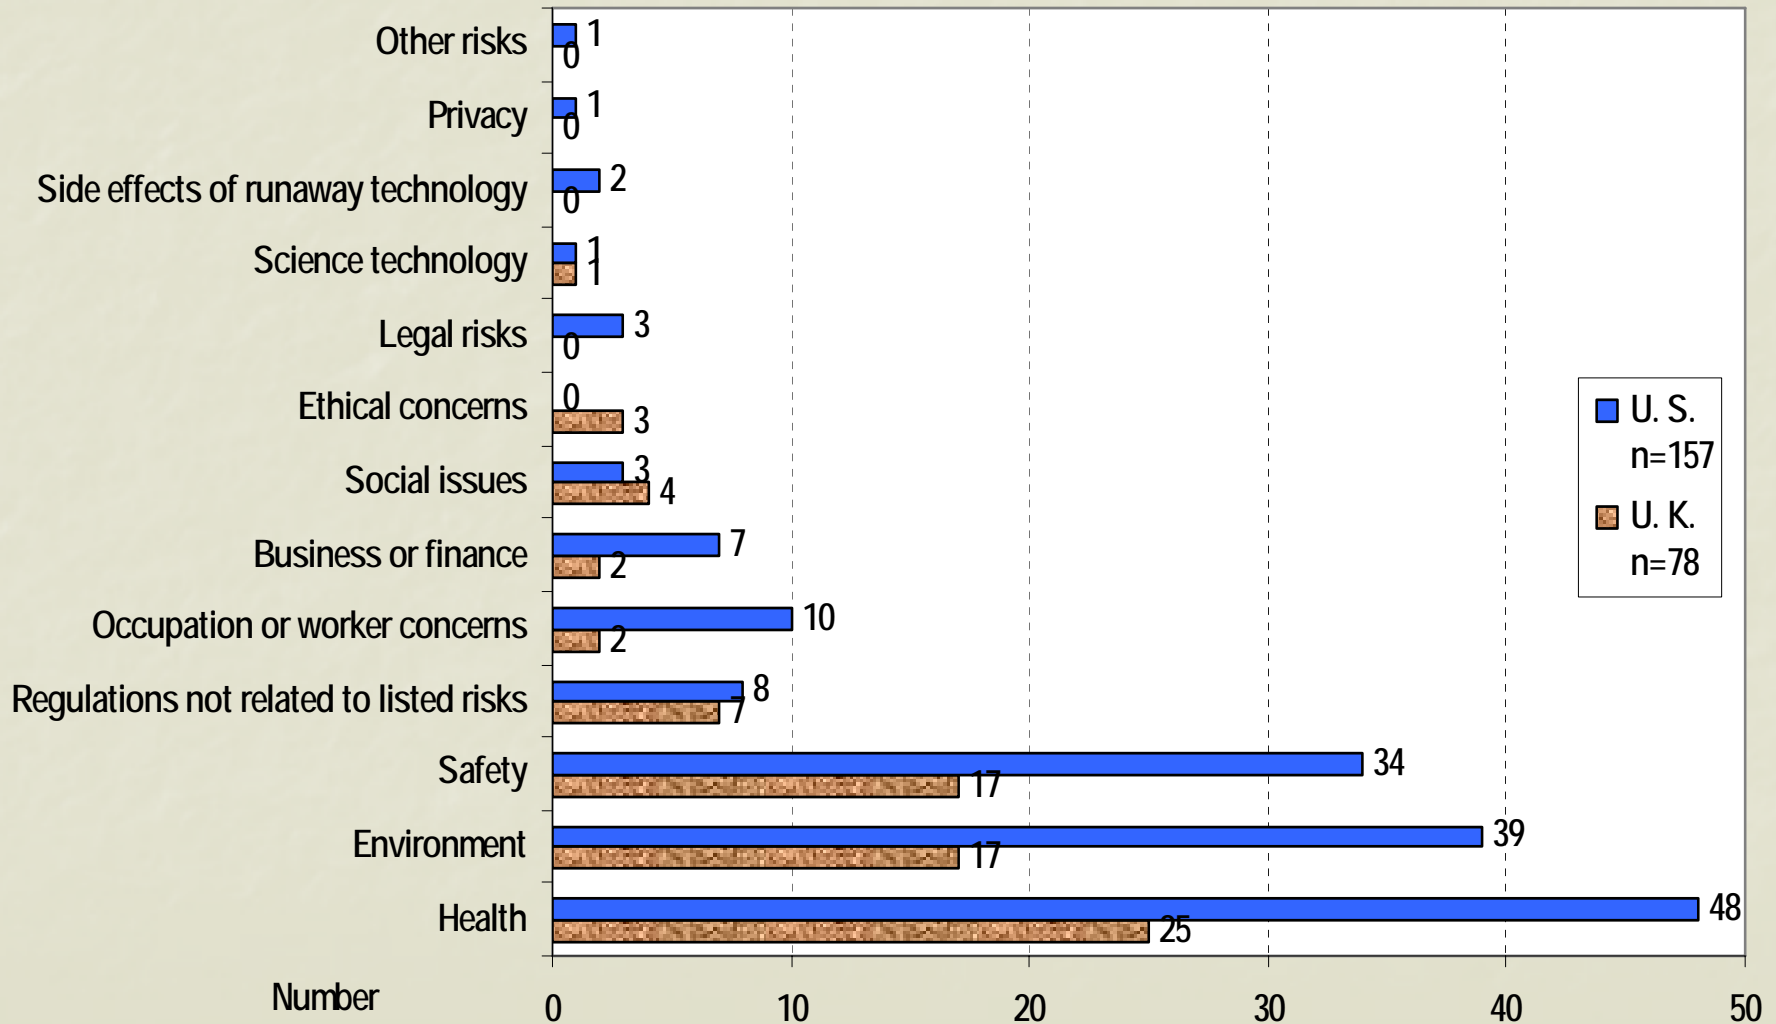

Number of calls for new or tightened regulations

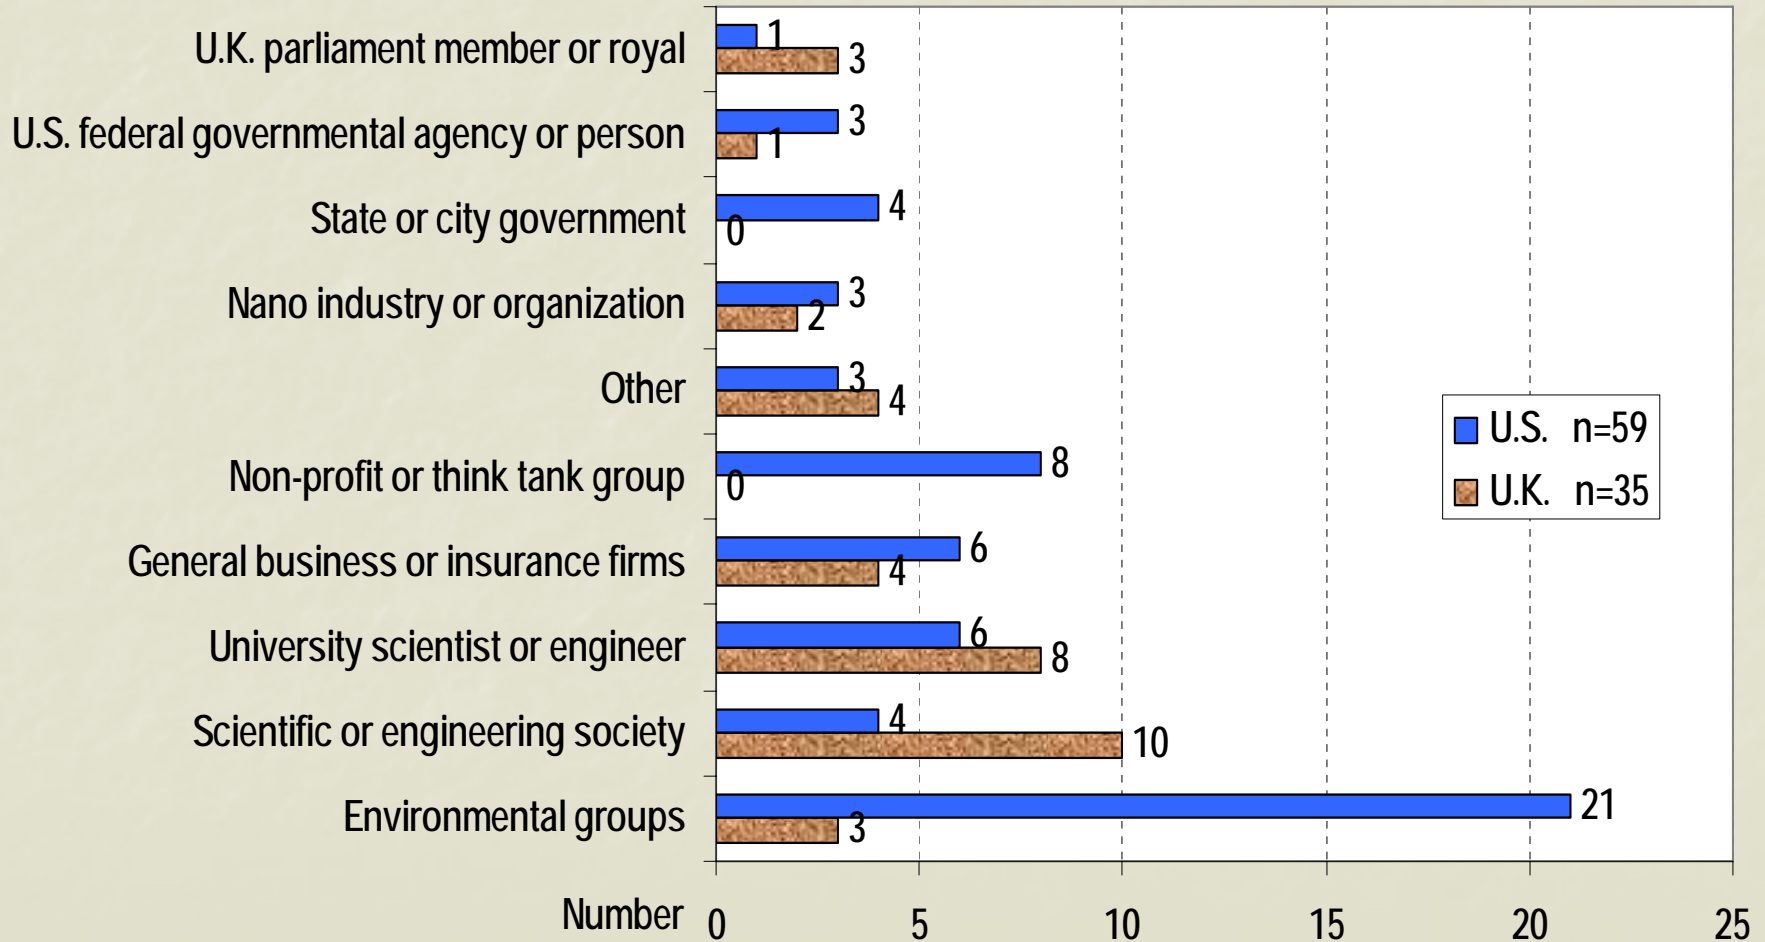

Number

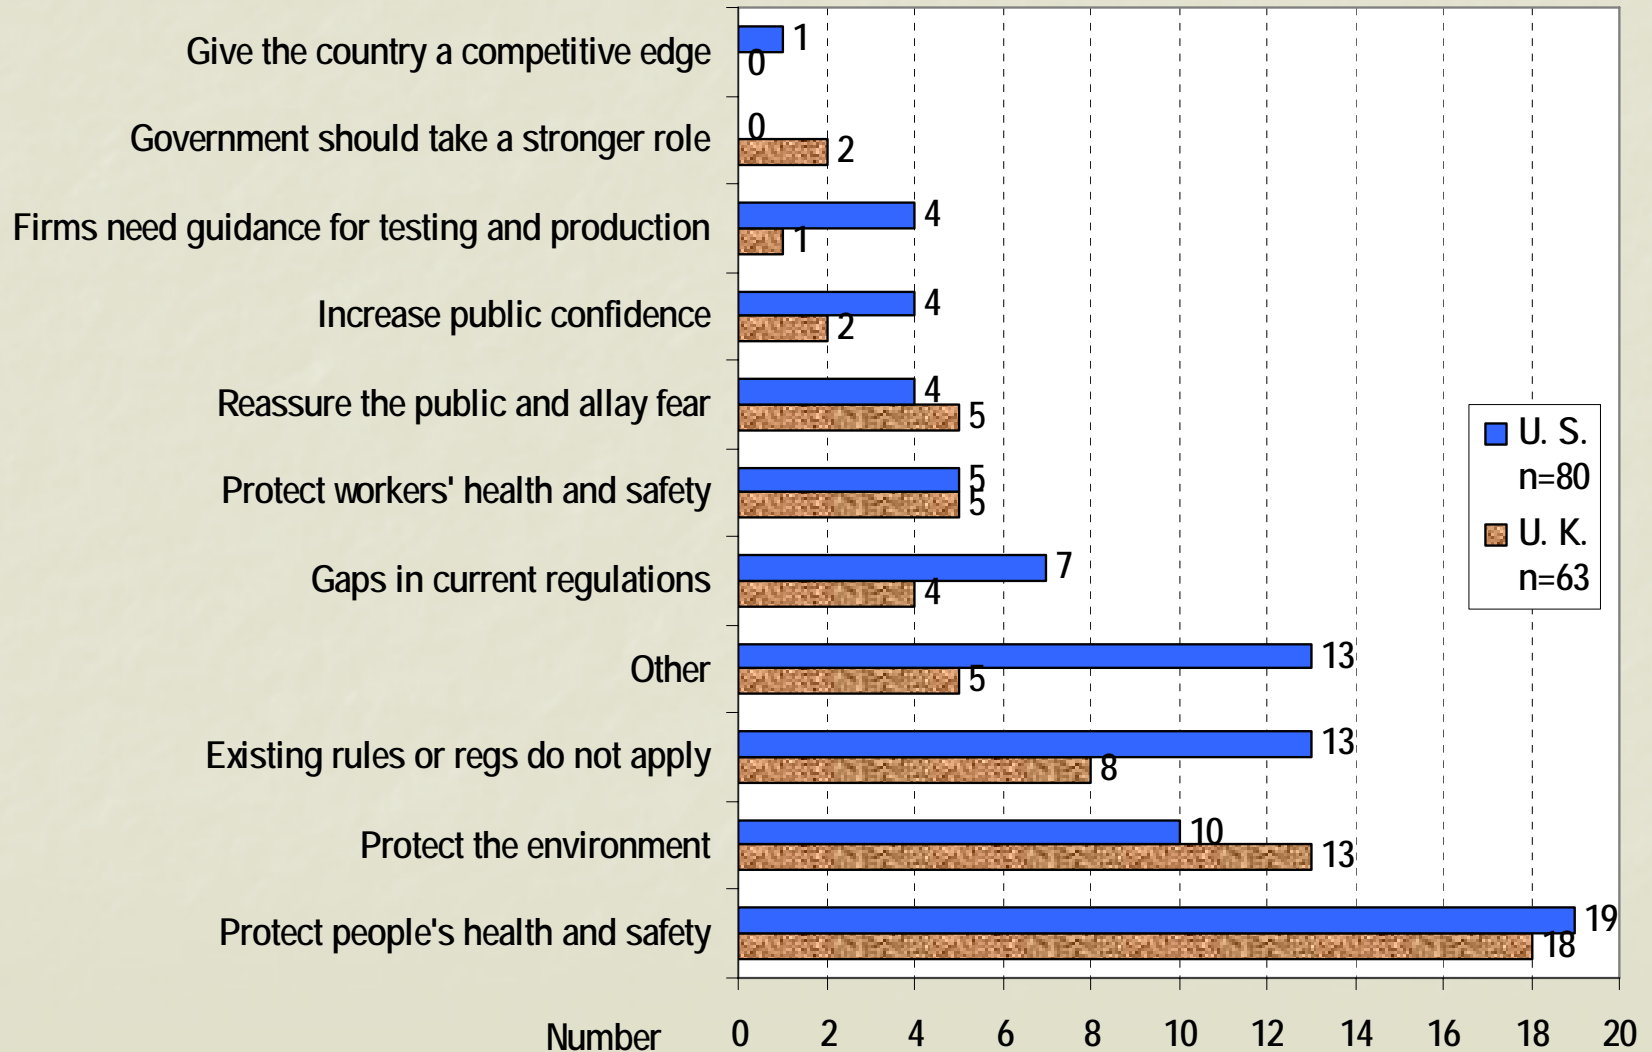

Types of risks related to regulation calls

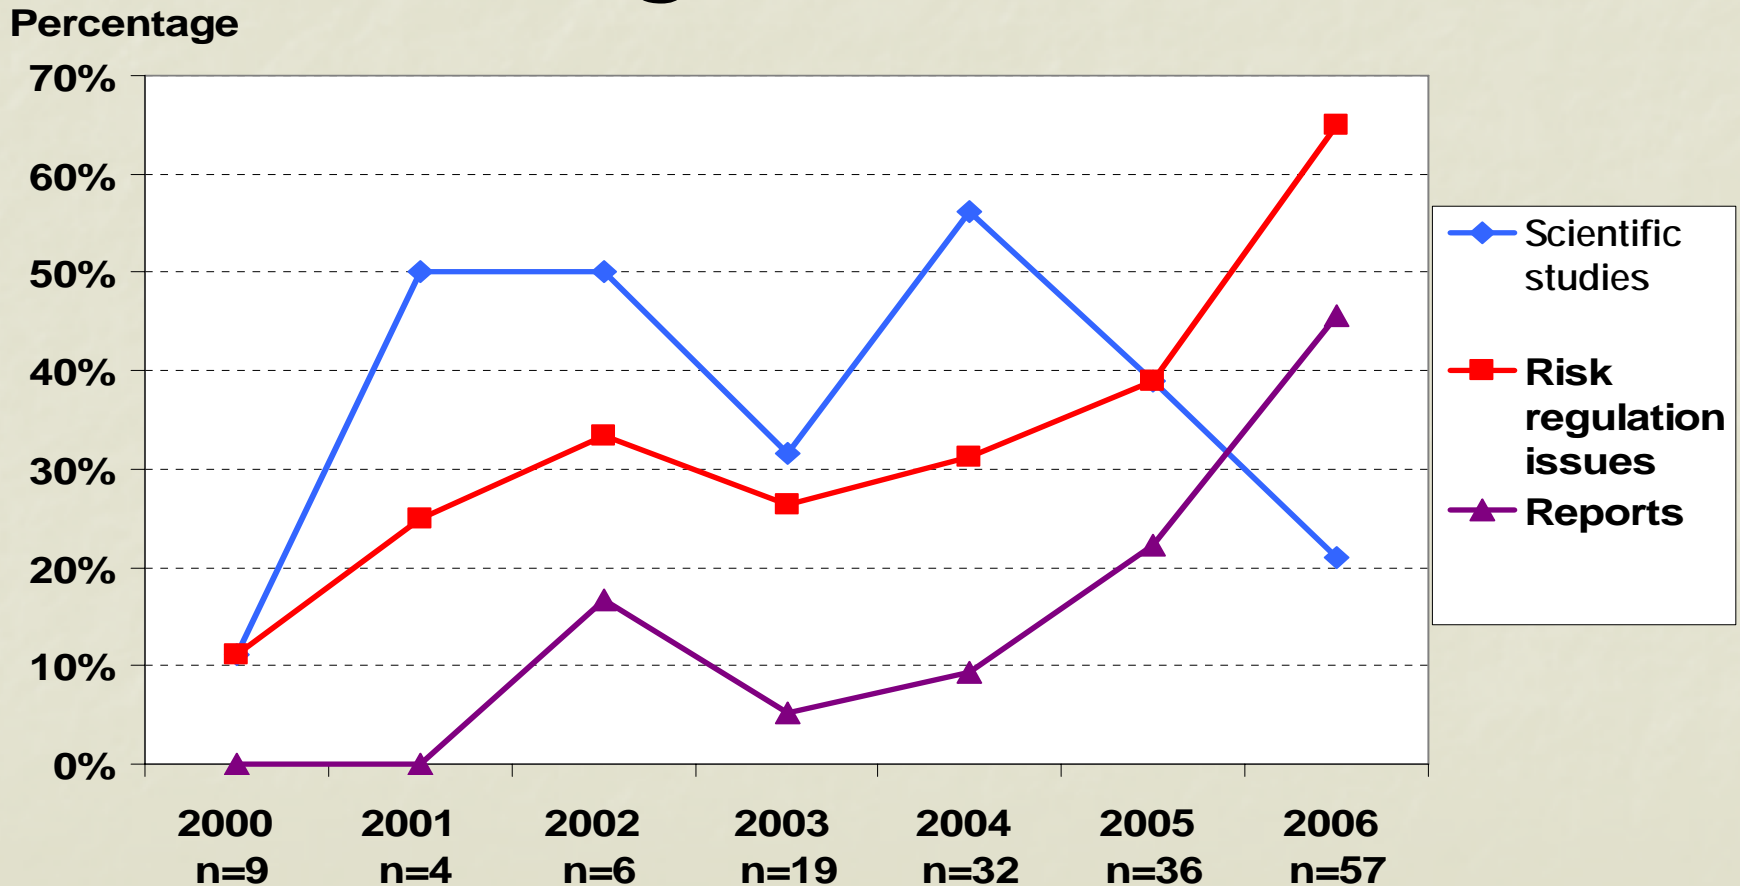

Number of groups that called for new or tightened regulations

Reasons given for needing new or tightened regulations

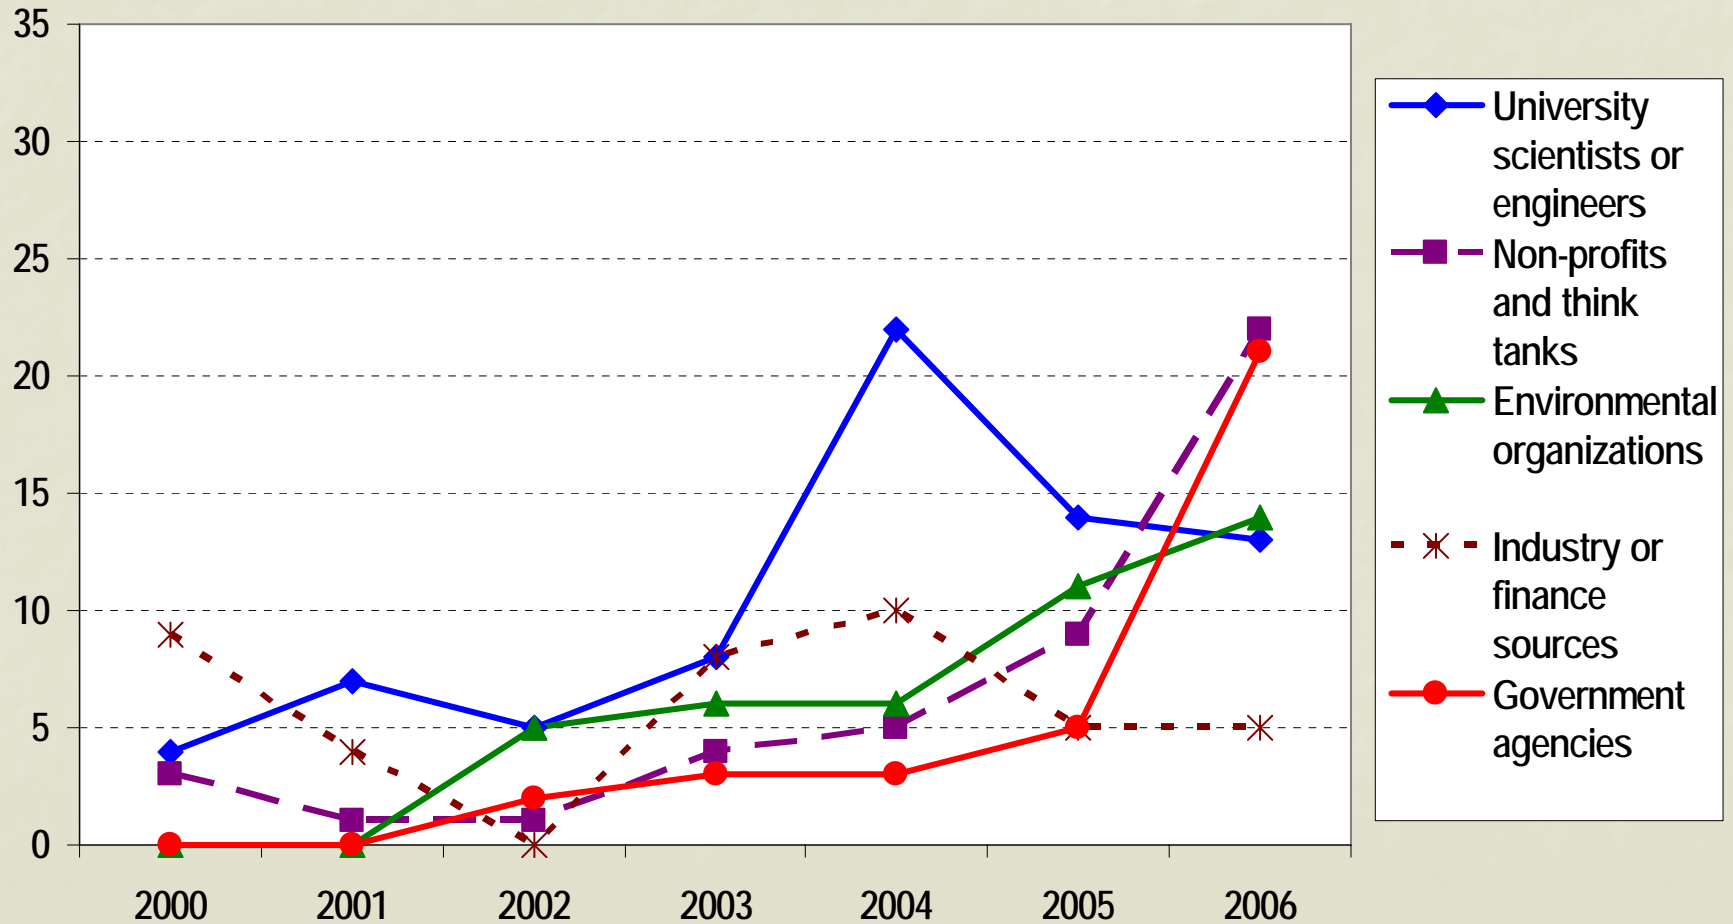

Percentage of U.S. articles on scientific studies, reports and risk regulation issues

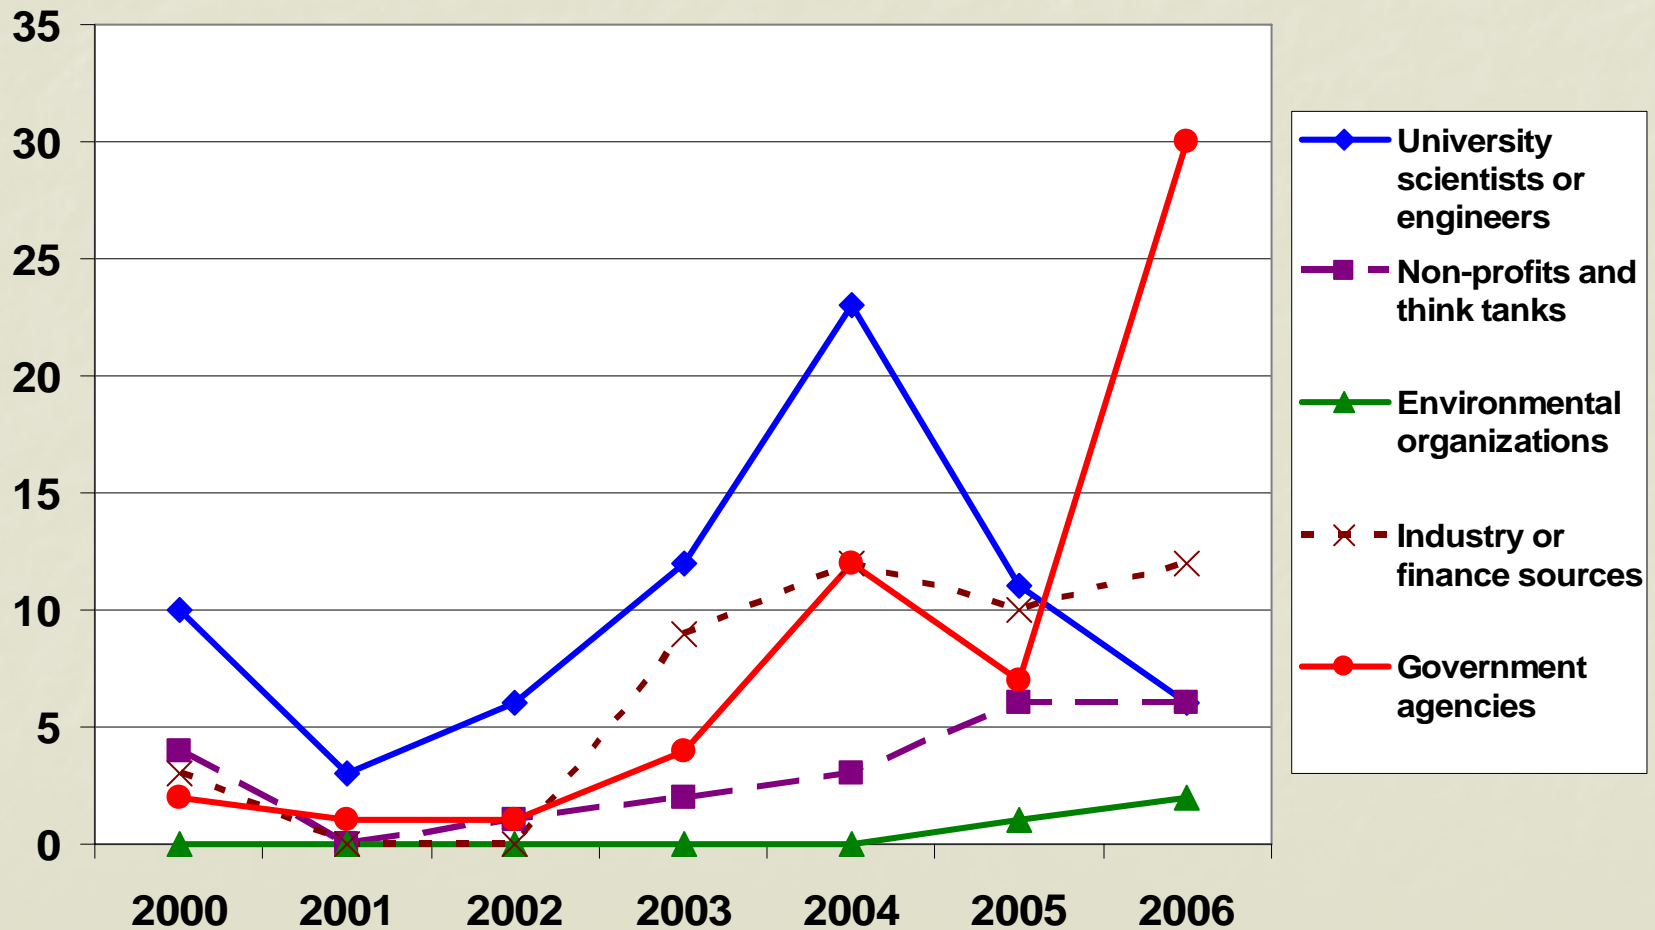

U. S. sources that raised concerns about risks over time

Number

U. S. sources that responded to concerns about risks over time

Number

Acknowledgements

We would like to thank the students who worked with us on the study this year: Christine Pense, Caitlyn Kennedy, Caitlin Shenk, and Christopher Knight. We also are grateful to Lehigh's Center for Advanced Materials and Nanotechnology for its support.

This research was funded under grants from:

- **The National Science Foundation to the Harvard-UCLA Nanotechnology and Society Network, NSEC CNS SES #0531146.**
- **The Materials Research Science and Engineering Center grant from the Pennsylvania Department of Community and Economic Development, Contract #: C000007361.**
